

From the production to the distribution, we take on a commitment of quality with users and environment. For this reason it's our task:

- guarantee the users security and the respect of cosmetic rules;
- to check the quality of our suppliers
- to check the environment impact of our structures, through:

- Energy saving
- Supervising of water's consumption
- Reducing to the minimum the use of raw materials
- Reducing to the minimum the use of paper and cardboard
- Use of recyclable plastic materials
- Adopting a waste recycling policy

To reduce at minimum the costs of transport and to reduce the consumption of fuel, we operate an ecological planning policy.

Our products are adequate to the rules:

- **ICEA**, institute for the ethic environment certification
- **ECOBIO COSMETIC**, eco bio cosmetic certificated formulations
- **COSMOS NATURAL**, community organization about the biological organic products, of which the following principal European certification authority are part: BHID, COSMEBIO, ECOCERT Greenlife, ICEA and SOIL Association that have subscribed the Bruxelles agreement, version 1.1 dated 20.07.2011

Finally, we produce ecological formulations:

- natural formulations
- organic formulations
- ecologic formulations
